

# Jens S has yet again secured the gold medal!!

We manage to beat last year's figures in the re-evaluation of EcoVadis!

Jens S is keeping its place in the top among the top 2% (previously 3%) of several evaluated companies in our industry. This evaluation is based, among other things, on our management system for the whole Jens S Group.

It is useful to be evaluated by an external party, to take part in their views on our business, so we can improve furthermore.

EcoVadis evaluates how companies are working with CSR – Corporate Social Responsibility. The purpose is for businesses to integrate human rights, environment and work environment, sustainability, fair business, social and social responsibility, anti-corruption etc. into their corporate strategies.

These methods are based on international accepted principles for reporting of sustainability such as GRI (Global Reporting Initiative), UN Global Compact and ISO 26000. They are audited by independent experts within sustainability.
